With few exceptions (see note), all approved grade stamps include the following five elements:

**Visually Graded Lumber**: 

<table>
<thead>
<tr>
<th>(a) TRADEMARK®</th>
<th>(b) Mill Identification</th>
<th>(c) Grade Designation</th>
<th>(d) Species</th>
<th>(e) Seasoning</th>
</tr>
</thead>
</table>

- **a. Trademark**: indicates identity of agency quality supervision
- **b. Mill Identification**: product manufacturer name, brand or assigned mill number
- **c. Grade Designation**: grade name [number or abbreviation]
- **d. Species Identification**: name or abbreviation of individual species or species combination
- **e. Condition of Seasoning**: moisture content classification at time of surfacing
  1. S-Dry – 19% maximum moisture content
  2. MC15 – 15% maximum moisture content
  3. KD – kiln dried to moisture content indicated in grading rules
  4. S-Gn – over 19% moisture content (unseasoned)

**Machine Graded Lumber**: 

Grade stamps on machine graded lumber include the five elements listed above for visually graded lumber. Grade designations for the two types of machine graded lumber, machine stress rated (MSR) lumber and machine evaluated lumber (MEL), are distinctive from those used for visually graded lumber grades.

**Machine Stress Rated Lumber (MSR) Stamp**:

<table>
<thead>
<tr>
<th>(b) Mill Identification</th>
<th>(d) Species</th>
<th>(e) Seasoning</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) TRADEMARK®</td>
<td>###</td>
<td>Fb - #.#.E</td>
</tr>
<tr>
<td>Machine Rated</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- MSR grade designations are composed of the assigned extreme fiber in bending (Fb or f) in psi and the assigned modulus of elasticity (E) in millions of pounds per square inch. Examples include 1650f-1.5E; 2100f-1.8E; and 2400f-2.0E.
- The phrase “Machine Rated” or “MSR” is also required on machine stress rated lumber stamps.

**Machine Evaluated Lumber (MEL) Stamp**:

<table>
<thead>
<tr>
<th>(a) TRADEMARK®</th>
<th>(b) Mill Identification</th>
<th>(c) Species</th>
<th>(e) Seasoning</th>
</tr>
</thead>
<tbody>
<tr>
<td>M – xx</td>
<td>###</td>
<td>Fb</td>
<td>#.#.E</td>
</tr>
</tbody>
</table>

- MEL grade designations use the format, M-xx; where xx indicates a one or two digit number. Examples include M-12; M-15; and M-19.
- In addition, the assigned extreme fiber in bending (Fb or f) in psi, the assigned modulus of elasticity (E) in millions of pounds per square inch, and the assigned tension parallel to grain (Ft) in psi are required elements on machine evaluated lumber stamps.

**Glued Lumber**: 

<table>
<thead>
<tr>
<th>(a) TRADEMARK®</th>
<th>(b) Mill Identification</th>
<th>(c) Species</th>
<th>(d) Species</th>
<th>(e) Seasoning</th>
</tr>
</thead>
<tbody>
<tr>
<td>(Type Glue/Appropriate Use)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Grade stamps on glued lumber include all the information indicated for visually graded lumber. In addition, the grade stamp includes a designation or abbreviation indicating the type of glue joint and appropriate use. Examples include “Stud Use Only”, “Vertical Use Only”, “Certified End Joint”, “Certified Exterior Joints”, “Heat Resistant Adhesive”, and “Non-heat Resistant Adhesive”.

1 Grade Stamp Layout – The placement of the required elements within a grade stamp may vary, depending on the preferences of the specific supervising agency. The sample grade stamp facsimiles that accompany the agency listing herein provide a good example of the typical placement of elements preferred by that particular agency. Contact the agency, whose trademark appears on the lumber, for specific information related to the agency's grade stamping policies.

2 When a combination species/species group nomenclature is shown in a grade stamp, the user of the lumber would select the weakest species/species group shown on the grade stamp as the appropriate value for the specific allowable property.

Note: Grade stamps for timbers are not required to include the condition of seasoning.

An approved grade stamp may include only a) trademark, b) mill identification, c) HT designation.

Grade stamps are permitted to include information that is not required, so long as the additional information is not confusing, misleading or deceptive. Contact the agency, whose trademark appears on the lumber, for specific information related to the agency’s grade stamping policy.
